1992, Campinas, Brazil – Studying nymphs of the Mato Grosso locust with Ivo Pierozzi Jr., a Brazilian colleague from Embrapa. (photo credit: Michel Lecoq)

native village was about a kilometer away, and everywhere around was the grassy, flat, and empty expanses of the Horombe Plateau. Having arrived at the end of the dry season, I barely had time to create a firewall around

my camp, before a bushfire would burn all the surrounding vegetation. I managed to save the camp...and my thesis work! I suppose that the purpose of such a site was also to test the resilience to field work, in somewhat spartan conditions, of a young student fresh out of Paris University and who had no preparations for work in the bush. I passed the test successfully and my tropical career was launched!

These are of course only two anecdotes. I was fortunate to be able to get excited about many other issues around the world. Unfortunately, all this work was inevitably strewn with moments of anguish and emotion: the attack of my camp by brigands in the Sahara in 1991 where a colleague was unfortunately killed, a helicopter crash the same year also in the Sahara in the middle of nowhere, a peasant revolt in Madagascar in 1971 and the attack on the small town of Batioky, headquarters of the national center for locust control...but also intense moments, such as a dinner with the emir of Kanem in Chad on the terrace of his palace, a meeting with the President of Senegal on the occasion of the

Desert locust invasion in 2005, the discovery of a dinosaur skeleton in the Saharan Tamesna, a head-to-head encounter with a deer and the discovery of recent traces of the passage of a panther while I was alone in the heart of the Brazilian Cerrado. Many moments of emotion where I happened to recall my reading as a youth the “Strange Safari” by Margaret Ruthin, or “The Mighty Orinoco” by Jules Verne. The enthusiasm of youth is a driving force to be cultivated throughout one’s life. That’s all that I wish my younger colleagues.

I will not finish this brief article of memories without thanking the Orthopterists’ Society for the confidence it has given me over the years in various positions of responsibility, for the wealth of scientific exchanges, for friendship developed with many colleagues, for the good times spent together in all corners of the world. Our society is a source of richness in the scientific world. Let’s continue to live life and support our Society with dedication, enthusiasm, pleasure, and love.
