Memo No.1003...../SDO/JLD

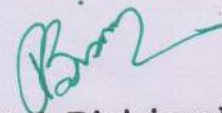

Dated: ...07.../05/2024

TO WHOM IT MAY CONCERN

This is to certify that Achhruram Memorial College, Jhalda is successfully maintaining a Rain Water Harvesting system in the college campus. The rain water harvesting system includes the catchment area from SC Girls' Hostel constructed under Babu Jagjibanram Chhatrawas Yojona to the State Highway 4A. A big pond is the main reservoir of the harvested rain water. It is one of the major Green Campus Initiatives for sustainable ecosystem of the college. The College authority is also using this pond for pisciculture.

I wish them good luck and success in future.
