Certificate Course on Spoken English

Department of English

(Academic Session – 2022-2023)

Course Objective:

- To help students improve their speaking ability in terms of comprehensibility and fluency.
- To help students understand accurate English pronunciation
- To enable students to use English for various practical purposes and hence, enhance their overall communication skills.

Participation: Students from any discipline having basic knowledge about English in terms of speaking, reading, writing and listening can join.

Duration: 30 Hours

Course Coordinator: Dr. Debmalya Das

Modules

Module 1: Self Introduction: 4 classes

- Introducing myself
- My family
- My friends
- My village/Hometown
- My university
- My country

At the end of the first four classes each student must submit a write up on self-introduction as his/her first home assignment

Module 2: Meeting and greeting people: 6 classes

- Conversation between two friends (There will be a group of two. You have to find a situation/topic e.g. the evening before an internal exam, planning for a movie date, a departmental picnic, congratulating your friend for her achievement, inviting your friend to attend some event etc.)
- Conversation between two unknown people
- Conversation between two friends and another unknown person (there will be a group of three)

Module 3: Formal/Official conversation: 3 classes

- Teacher-Student conversation (There will be a group of two. One will play the role of a teacher and one will be the student. The situation/topic may be diverse, e.g. responding in class, making queries, asking permission for some event etc.)
- Telephonic conversation (to customer care, online shopping sites, representatives of some tour agencies, etc.)

Module 4: Grammar classes: 3 classes

- Teaching and Practice (Types of sentences, Tense, Active-Passive voice, Preposition)

Module 5: Newspaper reading: 2 classes (Each student must bring an English daily such as The Statesman, The Telegraph for the exercise)

Module 6: Group Discussion and Bio-Data: 3 classes
At the end of the three classes each student must prepare a bio-data and submit. This is their second home assignment.

Module 7: Mock-Interview Session: 3 classes

Certificate course in Library and Information Management

Course Objectives

Library and Information Management is a course that specialises in library management and administration. The course is a culmination of disciplines primarily dealing in organization, access, collection, and protection or regulation of information, whether in physical or digital forms. Any student with a passion for the job of a librarian can apply for this course.

Expected Outcome

Students after completing this course will have gained knowledge about various operational subsystems of a library. During this course students will learn a variety of subjects including library organization and management, library catalogue, information sources and services, information technology and more. Additionally, the course helps students understand the tools of management applied, arranging library data by application of information technology and making them easily applicable to the public.

Course Content

Module I (8 hours)

Basic of Library Science: Information Society, Library Legislation, Public Library Act

Module II (4 hours)

Library Management: Managerial Tasks of Library Administration, Collection Development, maintenance and shelving

Module III (8 hours)

Knowledge Organisation: General theory of Library classifications (Theory) and Basic concepts of Cataloging (Theory)

Module IV (4 hours)

Information Sources and Services: Concept, Varieties and functions of Reference Department

Module V (8 hours)

Data, Information, Knowledge, ICT- Definition, Scope, Application of ICT in activities of library and information centers.

Certificate Course in Financial Mathematics for Real-Life Applications

Certificate Course

Course Duration: 32 Hours

Course Coordinator:
Mr. Laltu Gorai,
Dept. of Mathematics

Course Objective

To provide students with a practical understanding of financial mathematics and its applications in real-life scenarios, enabling them to analyze financial problems, make informed decisions, and manage personal and professional finances effectively.

Who can participate?

This course is suitable for Undergraduate students in Mathematics, Physics, Chemistry, or interested students.

Expected Outcome

Upon completing the course, students will master financial mathematics for real-world applications, including time value of money, interest rates, and investment analysis. They will adeptly solve financial problems like loans, mortgages, and retirement planning using mathematical tools and computational software. Students will evaluate financial products based on risk and return, developing critical thinking skills for informed decision-making. They will effectively communicate financial concepts orally and in writing to diverse audiences, ensuring clarity and understanding. Overall, students will be equipped to manage personal and professional finances wisely, making informed decisions and planning for long-term financial security.

Course Venue

Department of Mathematics,
Achhruram College, Jhalda,
Purulia, West Bengal, India

Course Content Modules

Module 1: Time Value of Money and Interest Rates:- Concepts such as present value, future value, annuities, and compound interest, providing a foundation for understanding the time value of money and financial decision-making.

Module 2: Portfolio Theory and Asset Pricing:- Portfolio optimization techniques, asset pricing models (e.g., CAPM), and diversification strategies to manage risk and maximize returns in investment portfolios.

Module 3: Derivatives and Risk Management:- Derivatives instruments such as options, futures, and swaps, along with risk management techniques including value-at-risk (VaR) and hedging strategies to mitigate financial risk.
